The redesigned Control Center has made quite a few functionalities more smooth-sailing. What has put CC in good stead is the ability to be completely customized to suit your needs better. Case in point, you can also add text shortcut to Control Center on your iOS device to quickly adjust font size right from CC without having to dive deep into the settings.

The apps that support Dynamic Type will automatically adjust to your preferred reading size; thereby improving your viewing experience. Let me show you how to easily fine-tune font size on iOS 13 devices!

# How to Quickly Adjust Font Size Right from Control Center in iOS 13 on iPhone and iPad

#### Add Text Shortcut to Control Center in iOS 13

**Step #1.** Launch **Settings** app on your iOS device  $\rightarrow$  Tap on **Control Center.**

Step #2. Tap on Customize Controls.

Step #3. Next, you need to tap on the "+" button to the left of the Text Size button located

under More Controls.

#### **Change Font Size from Control Center in iOS 13**

Once you have added Text Size shortcut to CC, you can comfortably alter the font size on your iOS device. To do so,

**Step #1.** Simply **swipe up** from the bottom of the screen to bring up CC.

Step #2. Tap on the text button.

Step #3. Swipe up/down on the button to increase/decrease the font size.

That's done!

If you want to change the font size of your device through traditional way, head over to Settings  $\rightarrow$  Display & Brightness.

Step #2. Tap on Text Size.
