People like making friends on Facebook. Some Facebook users even wish to have more friends than anyone else just to show how popular they are on this social site. After all, who doesn't want to have thousands of friends! However, there are many occasions you have to unfriend or completely block a Facebook friend due to personal reasons.

Should you wish to block or unfriend people on iPhone or iPad, here is how you can do so. But before you move on with the process, you should know the subtle difference between blocking and unfriend people in Facebook.

Difference between blocking or unfriending someone on Facebook

- **Unfriend**: When you unfriend someone on Facebook, he will still be able to view your profile and can even send you friend request.
- **Block**: When you block someone on Facebook, he won't be able to view your profile and can't send you friend request either.

Most Facebook users may not be able to distinguish between Unfriend and Block as both slightly sound to do similar function. However, they do have a lot of difference.

How to unfriend people on Facebook on iPhone or iPad

Here is how you can unfriend a Facebook friend, if you don't want to completely block them. Remember, the person can still see your profile, view your photos and even send a friend request.
