## How to change your Apple ID password on iPhone and iPad

1. Open **Settings** and tap the **Apple ID** banner.
2. Tap **Sign-In & Security**.  
*Older iOS versions will show Password & Security.*
3. Select **Change Password**.

4. Enter your iPhone or iPad passcode when asked.
5. Type the new password twice and tap **Change**.

You can use the same steps even if you have forgotten your current Apple ID password.

## How to change your Apple ID password on a Mac

1. Click the **Apple** logo.
2. Choose **System Preferences**.  
On macOS Ventura or later, it is *System Settings*.
3. Select **Apple ID**.

*On macOS Ventura, you need to click the Apple ID banner.*

4. Choose **Password & Security**.  
On newer macOS versions, you might see *Sign-In & Security*.

5. Click **Change password**.

*You may be required to wait for some time.*

6. Enter your Mac's password when prompted.
7. Type the new password twice to verify it.
8. Click **Change** to confirm.

**Note:** If you are on macOS Mojave or earlier, click iCloud → Account Details → Security → Reset Password.

You can follow the same steps even if you forget your password.

## How to change your Apple ID password from Apple Watch

1. Open **Settings** on Apple Watch.
2. Tap your **Apple ID**.

3. Now, tap **Sign-In & Security** (Password & Security).
4. Select **Change Password**.

5. You may be asked to *enter the code* sent to your Apple devices.
6. After that, enter your current password.
7. Then enter a new password.
8. Verify the new password by entering it again.
9. Tap **Change** to confirm.

## How to change your Apple ID password on the web

1. Visit [AppleID.Apple.com](https://appleid.apple.com) on a [browser](#).

## 2. Sign in with your **Apple ID**.

You can check **Remember me** to stay logged in.

The screenshot shows the Apple ID sign-in page. At the top, there is a navigation bar with links for Store, Mac, iPad, iPhone, Watch, AirPods, TV & Home, Only on Apple, Accessories, Support, and a search icon. Below the navigation bar, the page title is "Apple ID" and there are links for "Sign In", "Create Your Apple ID", and "FAQ". The main content area features a large Apple logo surrounded by a circular pattern of colorful dots. Below the logo, the text "Apple ID" and "Manage your Apple account" is displayed. A sign-in form is centered on the page, containing two input fields: "Apple ID" with the email address "igeeksmedia@gmail.com" and "password" with a masked password ".....". A blue arrow button is located to the right of the password field. Below the form, there is a checkbox labeled "Remember me" and a link "Forgotten your Apple ID or password?" with an external link icon.

## 3. Select **Sign-in and Security** and click **Password**.

4. Enter your current password.
5. Then enter your new password.
6. Next, enter the new password again to verify.
7. Click **Change Password** to confirm.

## **How to change your Apple ID password from another device using the Apple support app**

If you do not have access to any of your Apple products, or if you think that someone has your devices as well as your password, then you need to quickly get help from your friends or family and follow these steps:

1. Install the [Apple support app](#) on their iPhone.  
*You can also use an iPad or iPod touch to run iOS 12 or later.*
2. Scroll down and tap **Reset Password**.
3. Select **A different Apple ID** and follow the instructions.  
*If your ID is already there, select that and tap **Continue**.*
4. Enter the **Apple ID** and **password**.
5. Enter any of the **linked numbers** and tap **Done**.
6. Tap **Next**.

7. Select any of the following options:
  - **Done:** Upon clicking this option, a password reset link will be sent to any of your devices. Choose this if you have access to the device. After selecting this option, follow the instructions to reset your Apple ID password.
  - **Cannot access your Apple devices?** To continue the password reset process on that device. If you select this, follow along.
8. Select **Send Code to Trusted Number**.
9. Enter the **Verification code**.

10. Now, enter the **passcode of the iPhone** logged in with your Apple ID.  
If you forgot your iPhone Passcode, we have a [detailed guide on how to reset it](#).
11. Next, enter the new password.
12. Type the password again to verify.
13. Tap **Next** to confirm.

## Visit the Apple Store to change your Apple ID password

What? Is no one ready to give you their iPhone to reset the Apple ID password? Well, as life would have it, sometimes we have to fight our battles alone. But don't give up hope; if no one is there for you, you have [Apple Support](#) (For issues related to Apple Products, not life).

You can visit the nearest Apple Store and get help from there.

Do keep in mind that you will require an account [recovery contact](#) so that they can help you reset your password.

## Change your child's Apple ID password

You can change your Apple ID password and, if you have added your child through [Family Sharing](#), the password of their Apple ID.

1. Open **Settings** → **Apple ID**.
2. Tap **Family** and select your **child's account**.
3. Now, tap **Change (child's) Password**.
4. Next, enter the new password.

Please note that this feature only works for those who have already set up Family Sharing on their Apple ID.

### That's it!

Resetting your Apple ID password once in a while also ensures your account is protected from hacking and malicious apps and websites. If you still have any doubts or queries, let me know in the comments.

## FAQs

### Does changing the Apple ID password change it on all devices?

Yes. Once you change your Apple ID password, it will be reflected on all other devices logged in since it is linked with iCloud.

### How long does it take to reset your Apple ID password?

Depending on the method, you can reset your Apple ID password anywhere between 5 and 15 minutes.

### Why must I wait 27 days to reset my Apple ID password?

If you have seen this prompt, Apple may be concerned about your account security and pushed this prompt for security reasons.
