Whenever I have to communicate with my peers, friends and loved ones, WhatsApp is my go-to service. Naturally, it hogs more storage than any other app on my iPhone thanks to all those funny videos and photos that I love to exchange. To ensure the messaging app doesn't go overboard or consume more storage than I have allotted it, I make sure to clean it up from time to time. Luckily, clearing WhatsApp chat history on the iPhone is not a big deal as you have complete control over what you want to eliminate and keep.

Are you also willing to clean up the messaging app? I would suggest you back up the chat history first if you don't want to lose it for good. When you clear any chat, it also removes all the sent and received media. So, move ahead with the process while keeping these things in mind.
