

To make using [Apple Music](#) more entertaining, you can view animated cover art while listening to your favorite tunes on your iPhone. Unfortunately, not everyone will like this feature—maybe you think it's distracting, it could be draining your battery, or you even find it bothersome as it can affect those with motion sensitivity.

What is animated cover art in Apple Music?

Apple introduced animated cover art with iOS 14. This cool feature lets you see the album cover artwork in motion.

Apple took this feature up a notch to provide animated cover art in the Now Playing area of Music. So, you can see even more of this moving art for your favorite artists and groups.

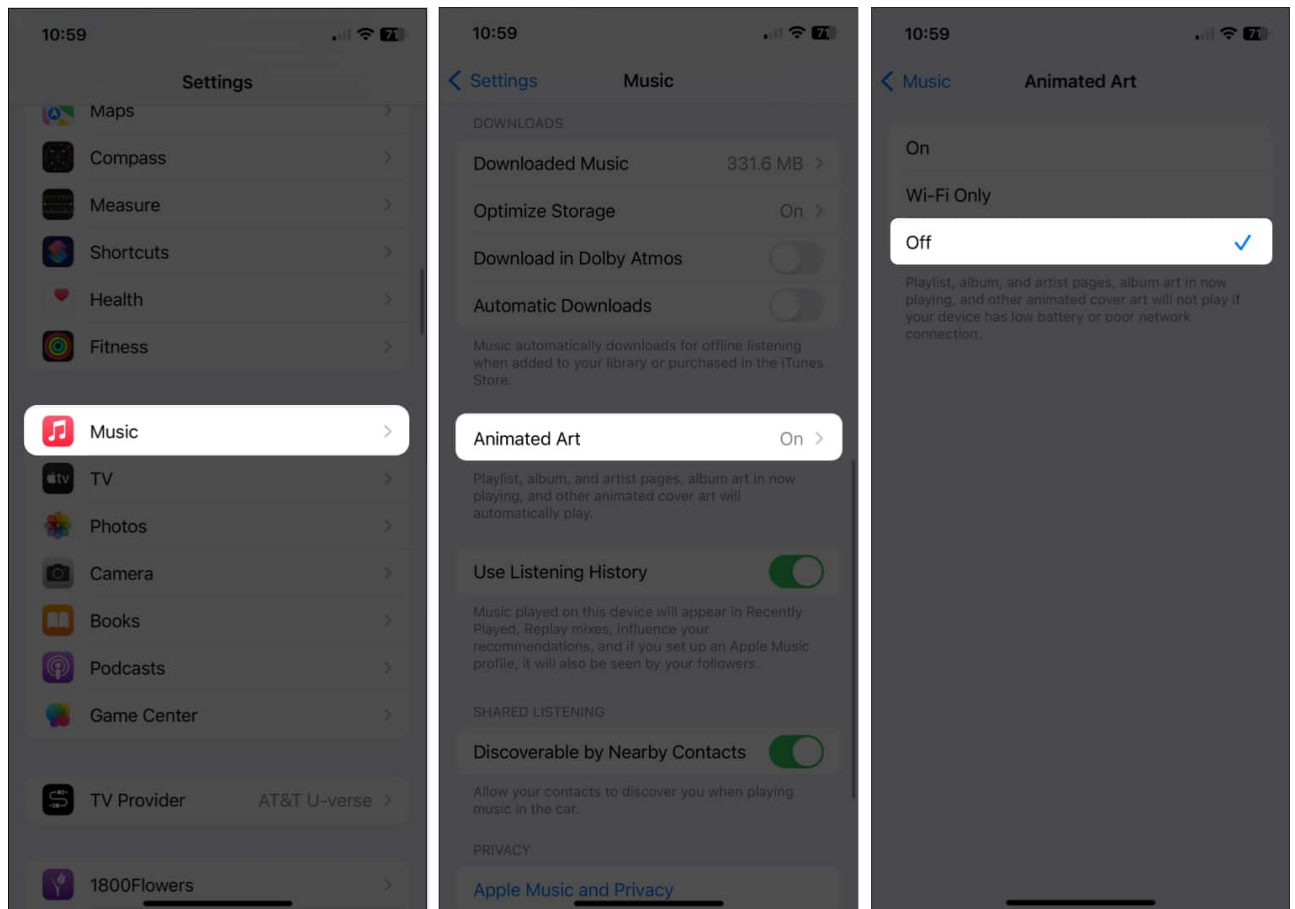

This feature is turned on by default. And although nifty for some, animated album art isn't for everyone.

Whether it's the floating butterflies and birds in Taylor Swift's *Folklore* or the colored flashes of light in The Weeknd's *After Hours*, you'll be glad to know that you can turn off motion artwork in Apple Music in just a few taps.

Follow these simple steps to turn off animated album art when playing music with Apple Music. If you change your mind later, you can turn the feature back on just as easily.

How to turn off or on animated album art in Apple Music

1. Open the **Settings** app on your iPhone → Tap the **Apps** → Select **Music**.
2. Scroll toward the bottom and choose **Animated Art**, which displays as "On."
3. Tap **Off** on the following screen.

Things to know about motion artwork:

- **On iPhone and iPad:** Even if you have Animated Art turned On, you may not see the moving album covers if you have Reduce Motion enabled in the Accessibility settings, the [Low Power Mode](#) feature turned on for your battery, or the particular artist's album doesn't support animated cover art.
- **On Mac:** Animated Art automatically gets disabled when you put it in [Low Power Mode](#).

Just listen to the music!

Whether preference or necessity, you can easily disable animated cover art in Apple Music. Then, just listen to the songs you enjoy without distractions or while you do other things.

What are your thoughts on animation features overall? Do you like them for certain things but not for others, or would you rather not see them at all? Let us know!
