Sharing your Wi-Fi password with another Apple device user is easy, but the same isn't true with non-Apple users, especially if you can't recall the password. Fortunately, Apple has made it easy to see saved Wi-Fi passwords on iPhones running iOS 16 or above.

In this guide, we'll show you a few ways to find your Wi-Fi passwords on your iPhone, along with some workarounds you can use if your iPhone doesn't support iOS 16.

How to find Wi-Fi passwords on iPhone in iOS 18

With iOS 18, Apple added a new app named Passwords that securely stores all the passkeys associated with your iPhone, including the passwords of the Wi-Fi networks the iPhone is or was connected to. You can head to the Passwords app to view the Wi-Fi passwords.

- 1. Open the **Passwords app** on your iPhone and tap on the **Wi-Fi tile**.
- 2. Here, tap on the Wi-Fi network whose password you want to view.

How to find Wi-Fi passwords on iPhone in iOS 17

Follow a few simple steps to find saved Wi-Fi passwords in iOS 17. You can also use the steps to see Wi-Fi passwords on your iPhone running on iOS 16.

igeeksbl^{_}G

- 1. Open the **Settings** app and head to **Wi-Fi**.
- 2. Tap the **i (Info)** button next to the saved Wi-Fi network you want to view the password of.
- 3. Tap on **Password** and authenticate with your Face ID to reveal the password.
- 4. Hit the **Copy** button to copy the password to your clipboard and save it in your favorite iOS note-taking app.

How to see saved Wi-Fi passwords on iPhone in iOS 15 or below

As mentioned above, you can only view the passwords of saved Wi-Fi networks on your iPhone if it's running on iOS 16 or above. If it isn't, you'll have to <u>use the Keychain Access</u> <u>feature on your Mac to find the Wi-Fi password</u>. Mind you, you need to be signed in with the same Apple ID on both your iPhone and Mac for this method to work.

Alternatively, if your iPhone doesn't support iOS 16 or you don't own a Mac, you can head to your router's admin page to find the password for your Wi-Fi network.

- 1. Open Settings on your iPhone and go to Wi-Fi.
- 2. Tap the **i button** next to the saved Wi-Fi network you want to find the password of.
- 3. Scroll down and copy the IP address next to Router.
- 4. Launch the Safari browser, enter the copied IP address in the search field, and tap Go.
- 5. Enter the username and password for your router. Unless you've changed them, you'll have to use the default username and password at the back of your router.

How to share Wi-Fi password from your iPhone

Now that you know how to find the password for the Wi-Fi network you are using or once connected to on your iPhone, you can either spell it out or simply copy-paste it into any messaging app to share with your friend.

However, if spelling or copy-pasting seems too much to you, you can use Apple's native Wi-Fi sharing feature to share Wi-Fi from your iPhone to another iPhone. In the case of a device other than an iPhone, such as an Android phone, you can <u>use the Passwords app on your</u> <u>iPhone</u> running on iOS 18 or the Share Wi-Fi Siri shortcut to <u>share the Wi-Fi password on an</u> <u>iPhone</u> running on iOS 17 or the previous version.

Stay connected

Forgetting Wi-Fi passwords is common. But with the right steps and knowledge, you can easily see saved Wi-Fi passwords on your iPhone. Did you find this helpful? Let us know in the comments.
