Not all photographs on your Mac are meant to be out in the open. Also, since you're storing them on your personal device, no one should be permitted to question you. However, privacy is almost a myth if you use a Mac shared with multiple users.

For such people, the good news is that you can hide photos on your Mac running macOS Monterey or Ventura. Read on to find out how.

How to hide photos in macOS Photos app

- 1. Open the **Photos** app.
- 2. Select **photo(s)** to hide.

3. Right-click and choose **Hide (number) Photos**.

4. Click **Hide** for confirmation.

Alternate method:

- After selecting photos, click **Image** at the top of the screen.
- Choose **Hide (number) photos** or use the shortcut **command + L** to open the confirmation box and confirm.

Please know that the hidden photographs remain on your device, and you can view them later.

Note: To view hidden photos: Launch **Photos** \rightarrow click **View** on the top left corner \rightarrow **Show Hidden Photo Album**.

How to unhide photos in macOS Photos app

- 1. Launch Photos.
- 2. Go to **View** on the top left corner of the screen.
- 3. Select Show Hidden Photo Album.

- 4. Select **Hidden** from the left menu in Photos.
- 5. Provide your **Touch ID** or **Password** to view the photo/photos.
