The moment you open a web page on your computer, it will start playing audio or video. If you haven't silenced the sound, you can experience an intense glare from people sitting around. Thankfully, there is a way to perfectly deal with that unsolicited stuff. In the Chrome browser on Mac or Windows PC, you can easily mute a tab in two different ways. Let's get started!

- How to Mute a Tab in Chrome on Mac and Windows PC
- How to Unmute a Tab in Chrome

How to Mute a Tab in Chrome on Mac and Windows PC

1. Open **Chrome** on your Computer.

4. For **Mac** user, you will have to click on the **Tab menu** from the **Chrome menu bar** and choose to **mute site**.

Note: After you apply this mute feature, it will work on that entire website and not only on that web page being explored by you.

How to Unmute a Tab in Chrome

- 1. Launch **Chrome** on your computer and open the site that you want to unmute.
- 2. This step is appropriate for both **Windows and Mac** user, you have to **right-click** on the muted site and select **an un-mute** site to **stop silencing audio** from the website.

3. For Mac user, you can also click on the Tab menu from the top navigation and click on Mute site again to un-mute the site.
