Can I recover deleted files from trash on Mac?

When it comes to deleting files, the topic is often broken down into three distinct categories: erasing information permanently, clearing out the recycling bin or Trash, and deleting files inadvertently. You may recover lost data on a Mac without the need for any additional

software if you make use of certain Mac tools discussed in the next section.

Additionally, you might need a [data recovery application](#) such as **Tenorshare 4DDiG** to retrieve anything that has been deleted from the trash on your Mac. With the help of this excellent data recovery application, you may recover deleted Trash on macOS Ventura, files that were deleted permanently, and even files that were wiped from trash.

Recover accidentally emptied trash in macOS Ventura

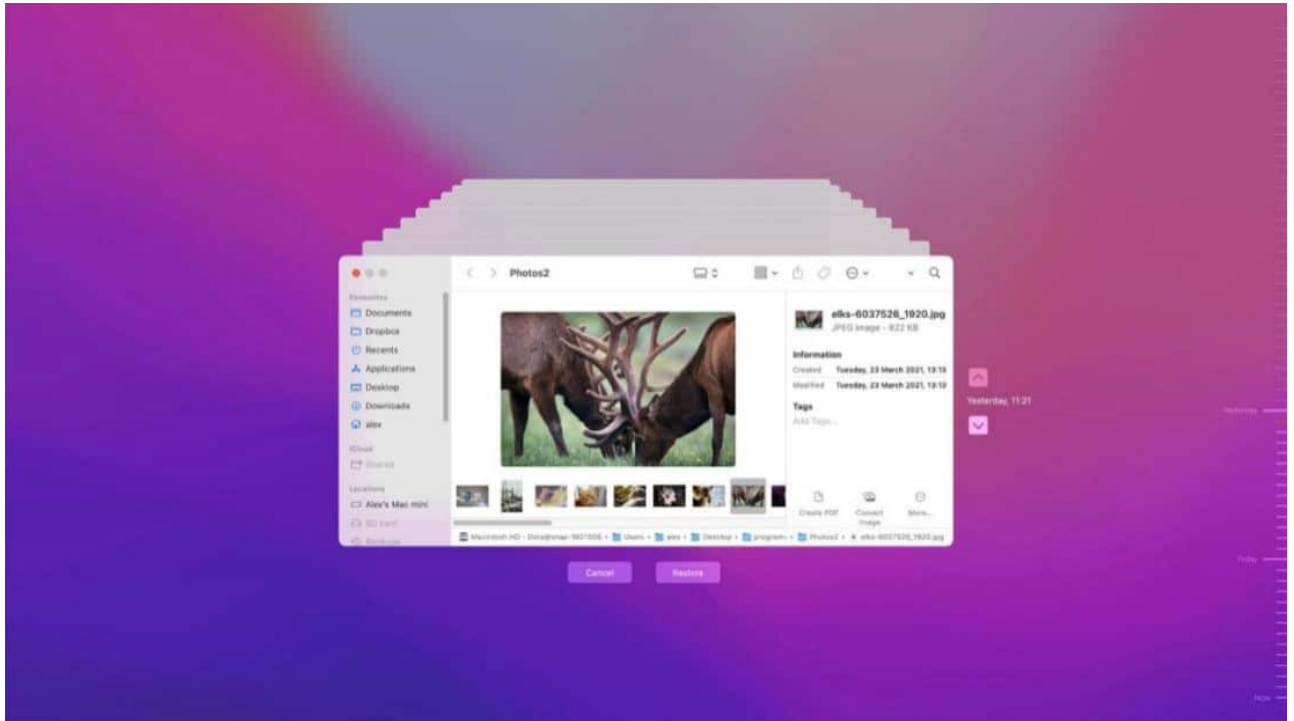

Here are some of the easiest and most convenient ways to recover deleted files from the emptied trash on macOS Ventura.

1. Use Time Machine

If you routinely back up your Mac, you may be able to utilize the backup media to retrieve items from the Trash bin after you have deleted them. The fact that you have a backup that includes the lost information is essential in this situation.

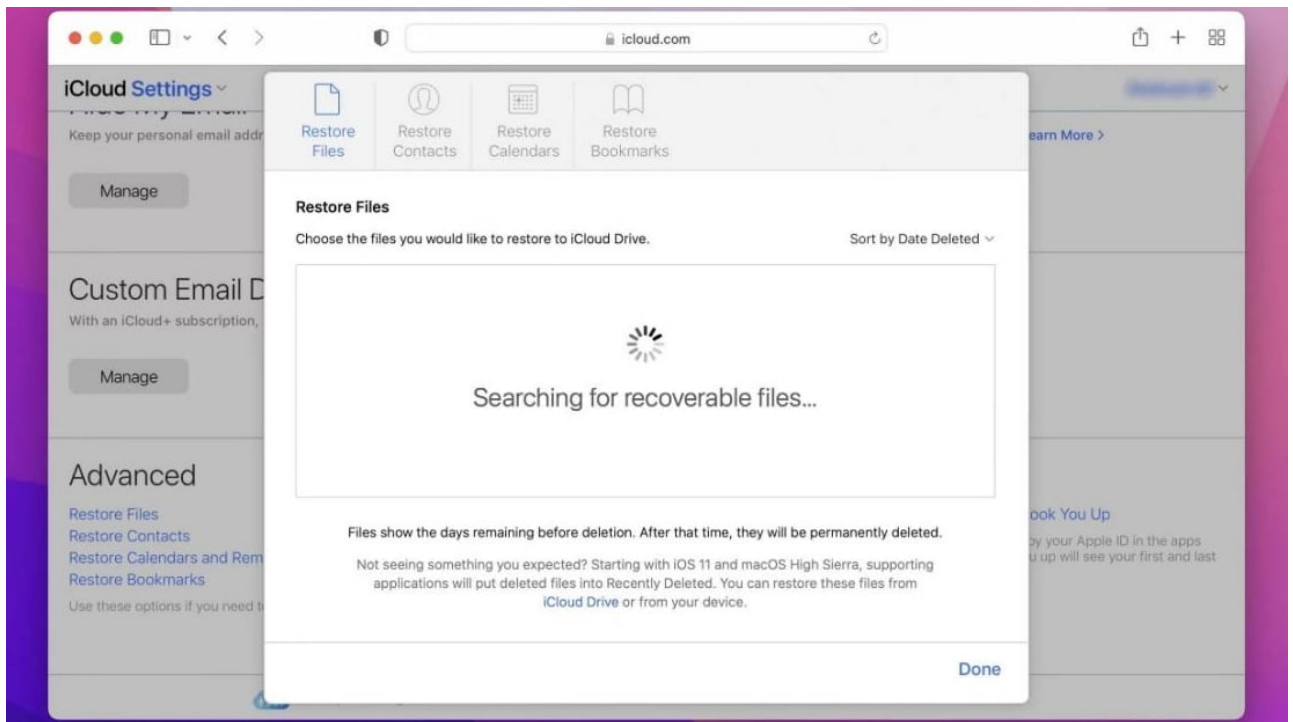

This backup and recovery program, known as Time Machine, is already pre-installed on your Mac. When recovering the trash from a Time Machine backup, use the technique.

1. Establish a connection between your **Mac** and the [Time Machine backup](#) media.
2. Launch the **Finder** application and go to the Trash folder. (It is also important that you verify the folders that had the files before you moved them to the Trash.)
3. Launch **Time Machine** and go through its archives for the things you erased.
4. Choose the things that need to be recovered, and then click **Restore**.

2. Use iCloud backup to recover emptied trash

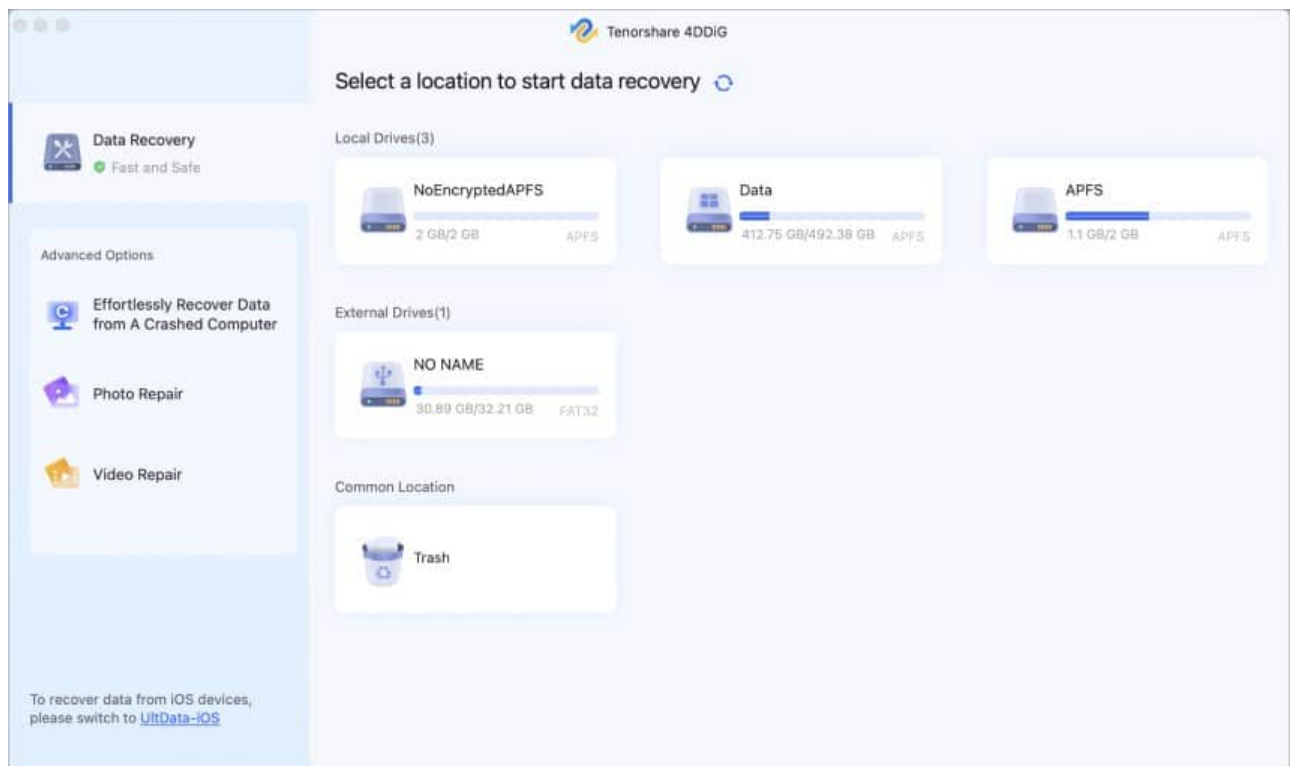

1. Visit [iCloud.com](https://www.icloud.com) and sign in there.
2. To open the iCloud Settings web app, you will need to click the **gear icon**.
3. Scroll down until you reach the bottom, then click the **Restore Files button**.
4. Select the files that were deleted lately that you wish to recover, and then click the **Restore** button.

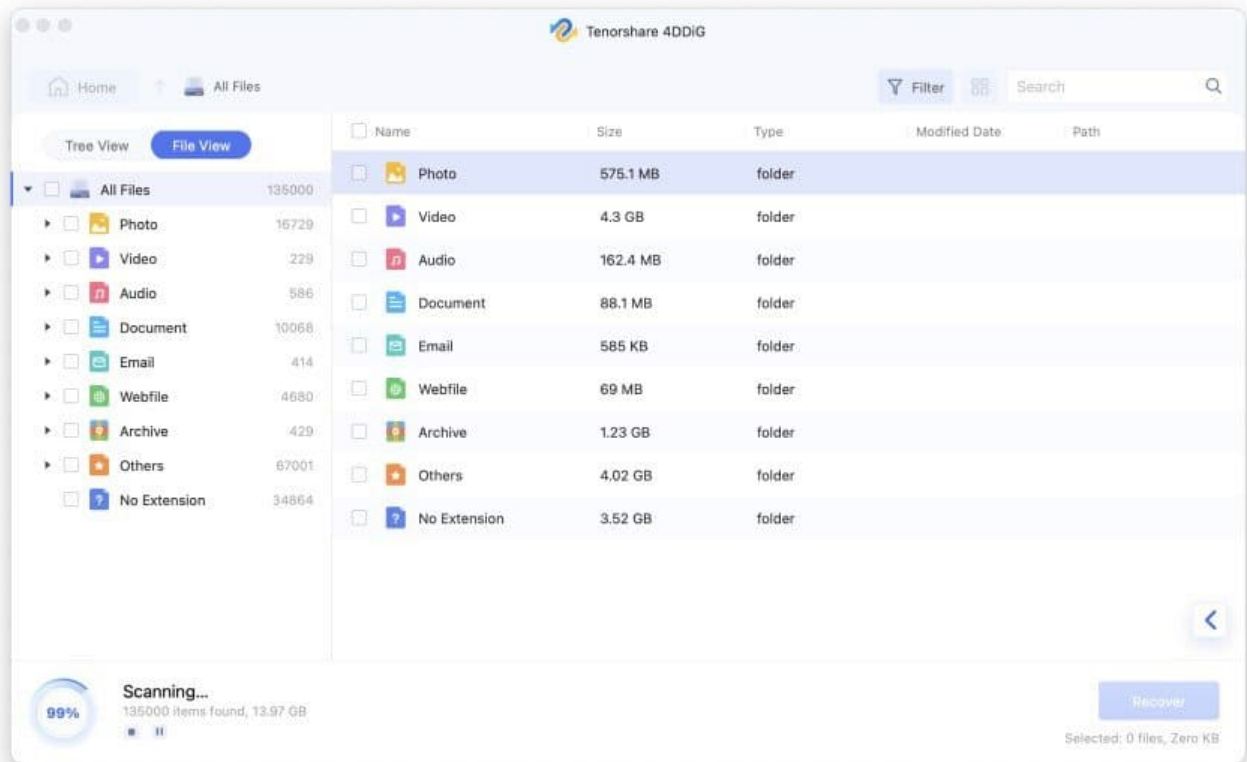

3. Use Tenorshare 4DDiG to recover trash files in macOS Ventura

Even after you delete a file, it will remain on the hard drive until another file is stored in the same place. But you can retrieve deleted trash easily with solid data recovery software designed for Mac. Here, we'll be using [Tenorshare 4DDiG Mac data recovery](#).

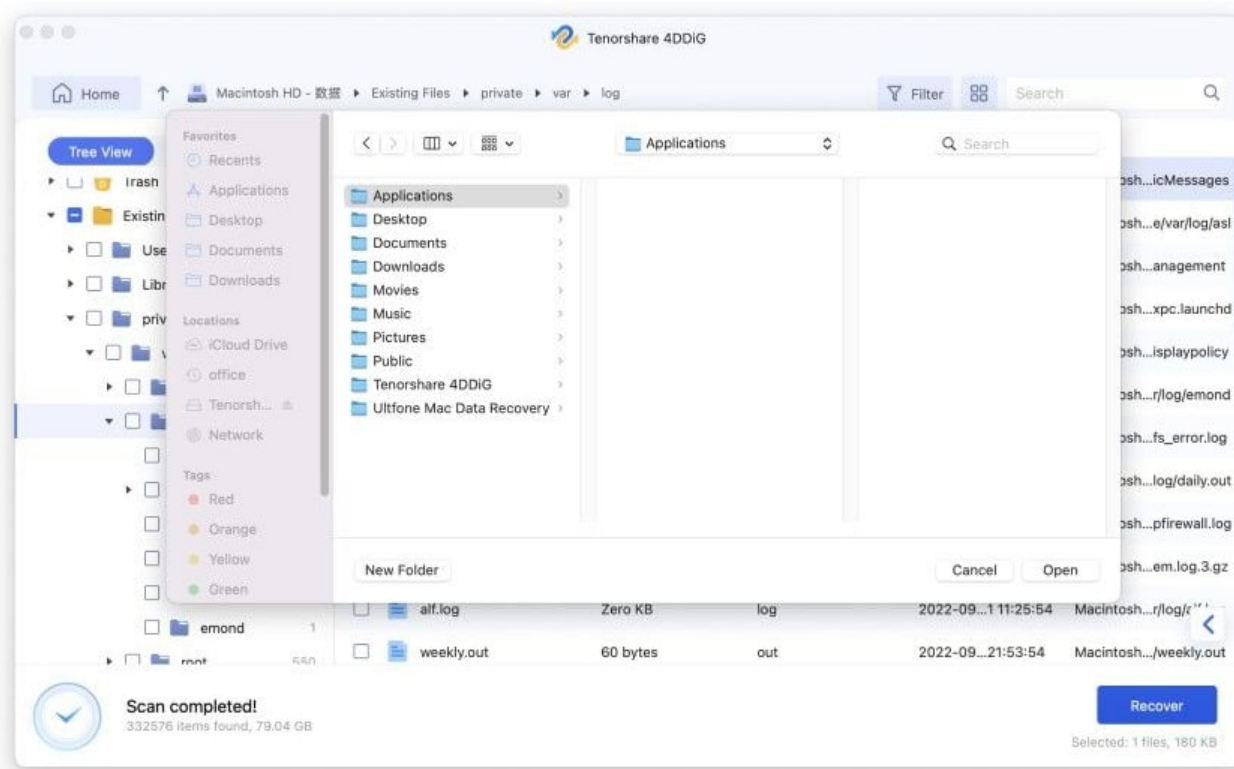

1. After the installation is complete, launch **4DDiG-Mac** and choose a place, such as your local disks, to begin the data recovery process on your Mac.

2. When you move the mouse pointer over the spot you want to scan, a little icon with the word "Scan" will display in the corner to the right. Simply start the search for your missing files by clicking the **Scan** button.
3. The process of checking for deleted files takes some time. After the result of the scan has been obtained, you will be able to choose individual file types and get a preview of further data.

4. Click the **Recover** button, and then choose a place to save the recovered data. It is not advised that you save the recovered data to the partition on which you had previously lost them.

To learn how to retrieve deleted data from the trash after emptying it, download Tenorshare 4DDiG Mac Data Recovery and watch the accompanying video that explains how to recover emptied trash on Mac.

4. Get deleted files back from emptied trash using Terminal

1. Launch **Spotlight** on your Mac → Search and launch **Terminal**.
2. Enter **cd .Trash** and hit the return key.
3. Next, type **ls -al ~/.Trash** and hit the return key.
4. If you find your desired file, then type **mv xxx./** and move it to your desired location.
Here, xxx stands for the deleted file's name.

Q. Can you recover files after emptying trash?

Yes, you can get those files back with macOS data recovery software.

Q. How to view deleted files in the external drive trash on Mac?

Launch **Finder** → From the Finder's **Go** menu, choose **Go to Folder** → Type **.Trashes** as the

path and hit the enter key. Now, you will be able to view the deleted files on the external drive of your Mac.

Conclusion

You must act promptly if you discover that data on your Mac has been accidentally deleted by going to the Trash folder and recovering emptied trash. We hope the solutions provided here have addressed your concerns. If you have further queries, do let us know in the comments.
