The Mail app on the iPhone and iPad allows users to directly save different attachments to the Files app. This means you can access your documents from all your iOS devices. So, if you want to **save any email attachment from the Mail app to iCloud Drive**, follow these quick steps.

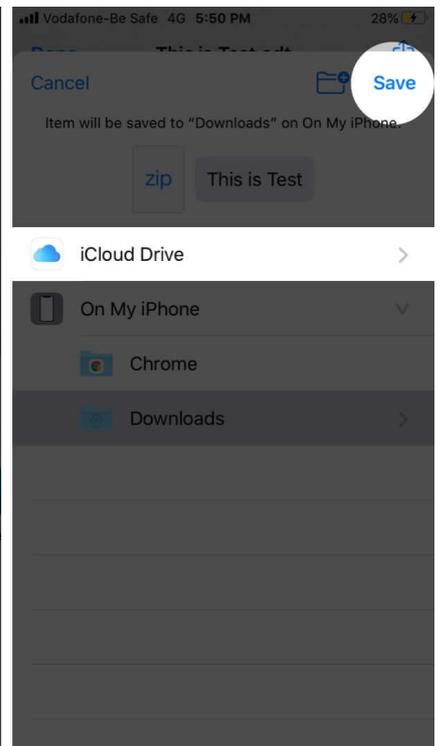

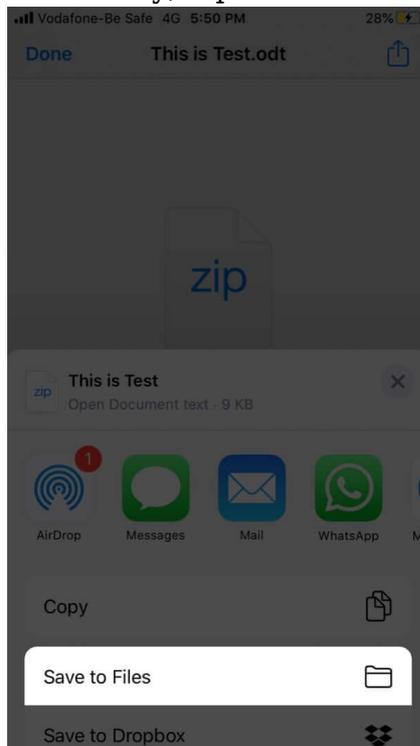

- [How to Save Email Attachments on iPhone or iPad to iCloud Drive](#)
- [How to Save Email Attachment to Dropbox, Google Drive](#)

How to Save Email Attachments on iPhone or iPad to iCloud Drive

1. Open the **Mail app** on your iPhone
2. Tap on a particular **email with the attachment.**
3. Tap on the **document** to open it. (Or, long press on the attachment to see a pop-up with options.)
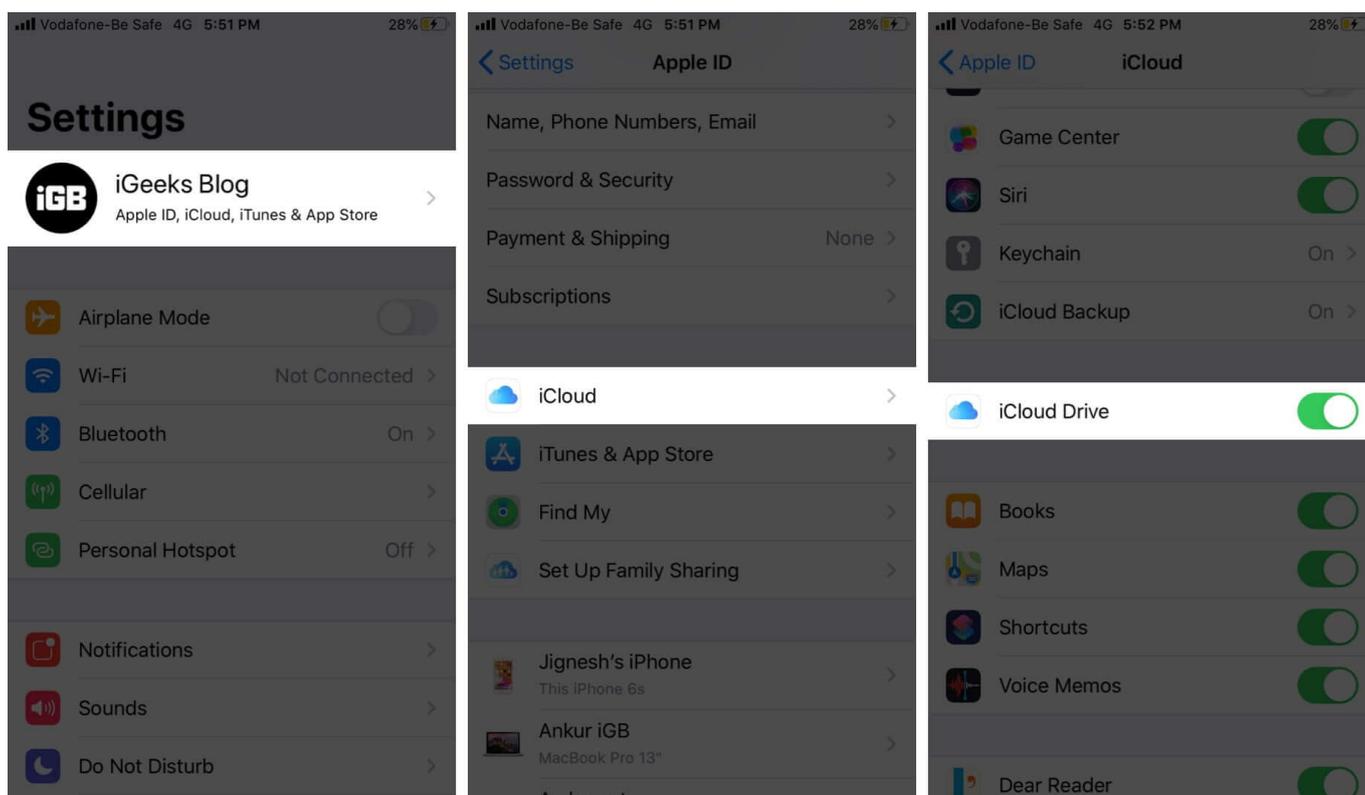

4. Tap the **share** icon
5. Tap on **Save to Files.**
6. Tap on **iCloud Drive** to select it. Finally, tap **Save.**

You can also choose a particular folder inside iCloud Drive if you already created it. Or, you can tap on the new folder icon (left to the word Save) and create a new folder to save the email attachment.
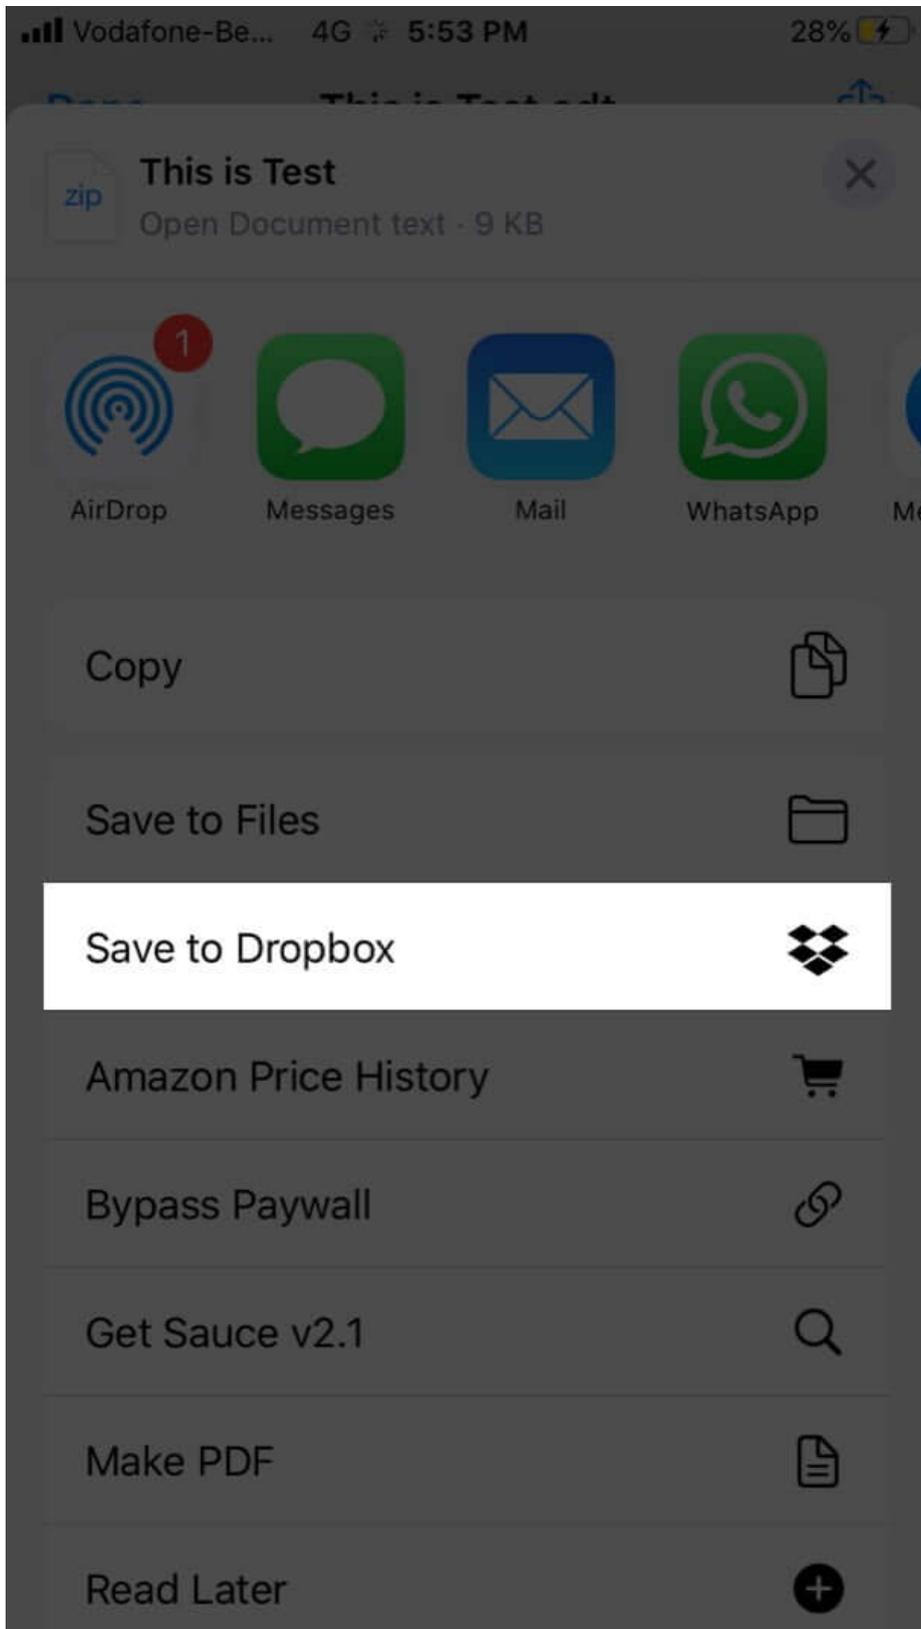

Note: In step #6, if iCloud Drive is grayed out, open the **Settings** app → tap on your **Apple ID banner** from the top → **iCloud** → scroll down and enable the toggle for **iCloud Drive.**

How to Save Email Attachment to Dropbox, Google Drive

Besides iCloud Drive, you can also save email attachments to Dropbox, Google Drive, and other cloud storage apps or third-party file manager apps.

The steps are the same. You have to follow step #1 to step #4, as shown above. After that, in step #5, instead of Save to Files, tap on **Save to Dropbox**, or **Save to Google Drive**, etc. accordingly.
