

“Can I save this webpage as a PDF on my iPhone?” A question you’ve surely asked as an avid reader.

When you spot an article worth reading or a website that catches your fancy, you can take it offline by converting it into a PDF. You can then return to the saved PDF for referencing or a quick read anytime you want.

Saving a web page as a PDF is straightforward but depends on the iOS version and the web browser you prefer. Let’s take a closer look.

## How to save a full-page screenshot as a PDF in Safari

1. Launch **Safari** on your iPhone and open the web page of your choice.

2. Now, screenshot the page. Tap the preview in the bottom left corner of the screen.
3. Tap **Full Page**, then tap the **Share** button at the top right. Select **Save to Files**.

4. Depending on your preferences, store the PDF either on your iPhone or the Cloud. And then tap **Save**.

And that's all there is for this method. However, if you're not a fan of taking a screenshot, there's another handy way to convert the webpage into PDF.

## Turn any webpage into a PDF using share sheet on iPhone

1. Open **Safari** and the page you want to save as a PDF.
2. Tap the **Share** icon from the bottom of the page.
3. Select **Options** from the top section of the window.

4. Here, select **PDF** and then **Done**.

5. You will now return to the Share sheet. Tap **Save to Files**.
6. Select the desired location and tap **Save**.

## How to save webpage as PDF from any browser using Shortcuts

1. Open **Shortcuts** and select the **Gallery** tab from the button right of the page.

2. In the search bar, type **Make PDF** and search.
3. Tap on '+' to add the Shortcut to your gallery.
4. Now select **Add Shortcut** to confirm the action. Once the Shortcut is added, you can save a webpage as a PDF from any browser.

5. Launch the **Chrome** browser and open the website of your choosing
6. Tap on the **Share** icon.

7. Scroll down and select **Make PDF** and tap **OK**.

8. Wait for the Shortcut to generate the PDF file, tap the **Share** icon.

9. Here, you can either save the file via **Save To Files** or share it directly by selecting the contact or app.

I must say, [Siri Shortcuts](#) have definitely made our lives easier. And this particular one should be part of every iPhone user's arsenal, especially those who prefer another browser over Safari.

## How to save a webpage as PDF in Safari

1. Launch **Safari** on your iOS device.
2. Next, head over to any webpage you want to save as a PDF.
3. Tap the **Share** button.

4. In the Share sheet, tap **Create PDF**.

5. Once the PDF is created, tap **Done**.
6. Tap on **Save File to...**

7. Select the location and save the web page as PDF.

So, those are the simplest ways to save a webpage as a PDF on iPhone or iPad! Have any feedback for us? We'd love to converse with you in the comments below.
