

Taking pictures and sharing them with our friends and family is one of the most common things. However, with innovation in technology and numerous mediums to do so, there's also a considerable amount of risk linked with the photos you share. iCloud photo sharing is one secure way to do so. It lets you share your photos with your friends and family with the utmost security and ease. Here's how you can turn on or off iCloud photo sharing on iPhone, Mac, and PC.

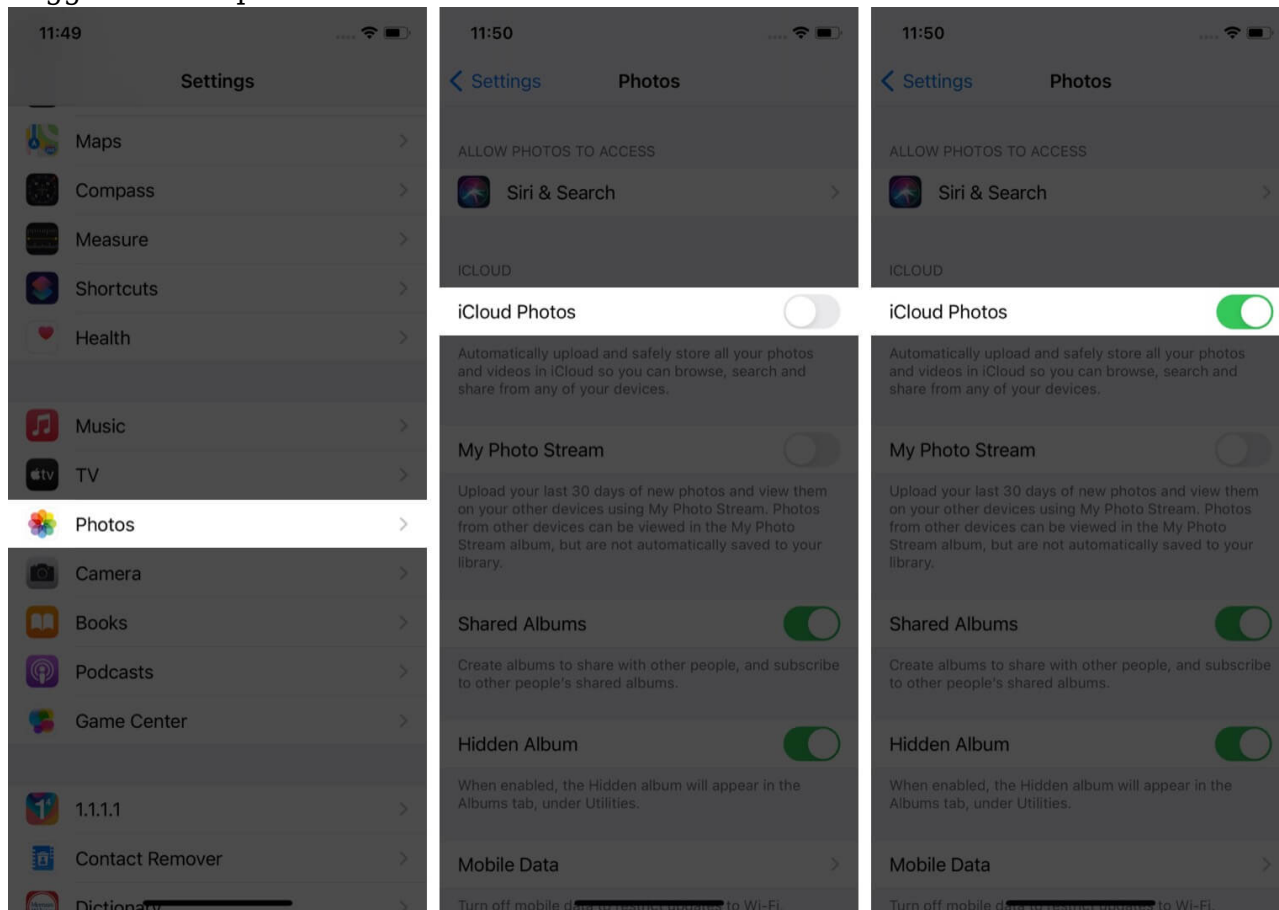

Before we begin

- Ensure that your Apple devices are updated to the latest version.
- Have iCloud setup on all your devices, and you are signed in using a standard ID.
- For Windows PC, your desktop should have Windows 7 or later. You can download [iCloud for Windows](#) here.
