## How to make a slideshow with music on iPhone

1. Launch the **Photos** app → Select the **photos** you want in a slideshow.
2. Tap the **three-dot icon** → Select **Slideshow**.

3. In this instance, a slide will play on your iPhone.

However, the slideshow we created above will have a default music and theme. But you can customize it with your favorite song and choose a suitable theme. Let's learn how!

## How to edit slideshow with music on iPhone

1. Tap the **slideshow** and select **Options** from the bottom right corner.
2. Here, you can alter the following parameters:
  - **Theme:** Select a pattern for the slideshow.
  - **Music:** Choose favorable background music. You can further select your favorite music through the **Music Library**.
  - **Repeat:** Toggle on this feature if you wish to play the slideshow in a loop.
  - Adjust the **speed** of the slideshow.
3. Hit **Done** once the settings are as you desire.
4. Tap the **play icon** to watch the slideshow with changes.
5. Select **Done** to exit from the slideshow.

You can also AirPlay the slideshow or [mirror your iPhone to an Android TV](#) to watch it.

Now that you have successfully created your photo slideshow with music on your iPhone for free, you must want to save or share it, right?

## How to save Slideshow on iPhone

Unfortunately, sharing or saving a slideshow created on an iPhone using the Photos app is impossible. But don't give up yet; I've one more trick up my sleeve. There is another best way to make a slideshow video with music on your iPhone. Read the following section to know more.

## How to create a slideshow using iMovie on iPhone

1. Download and launch [iMovie](#) on your iPhone.
2. Select **Magic Movie** under the Start New Project menu.

*If you cannot locate this option, swipe up the Start New Project interface.*

3. Choose the **pictures** you want in the presentation.
4. Once selected, tap **Create Magic Movie**.

5. Now, you will see a movie preview of selected images. Hit the **play** icon.
6. Choose the **enlarge** option to watch the slideshow in landscape mode.

7. Select the **Add button** to add images to the slideshow.
8. Here you can select any one of the following:
  - **Take Video or Photo:** Capture live Videos or Photos
  - **Select from Library:** Choose an existing image or video
  - **Add Clip with Title:** Select an existing template featuring a handful Project options.

9. Tap **edit** to customize the video picture slideshow:
- Select a **style** and add **music** as you desire.
  - Once you're good to go, select **Done**.

10. Finally, tap the **share icon** → Choose **Save Video**.

That's it. After complying with these steps, the following slideshow will be available in the chosen folder. In addition, you can share the slideshow through any medium or app directly from iMovie.

**Memories with melodies!**

And there you have it, a symphony of moments intricately woven into a beautiful slideshow with the power of music, all crafted within the cozy confines of your iPhone. You can also use your [Mac to create a slideshow](#) to transform everyday scenes into a captivating masterpiece.

Thank you for reading. Please take a moment to leave your thoughts in the comment section below.

## FAQs

### **How do I share my completed slideshow with others?**

Unfortunately, there is no way of sharing the slideshow directly through the Photos app. It only lets you make photo slides with music and AirPlay it on other devices.

### **Can I export the slideshow as a video file using the Photos app?**

While the Photos app doesn't offer direct export as a video file, you can use [screen recording](#) to capture the slideshow as a video. Remember to disable notifications to ensure a seamless recording.
