I adore how easy it is to make and receive phone calls from my iPhone when I'm working on my Mac. However, there are times when I want to be free from interruptions to focus solely on my work.

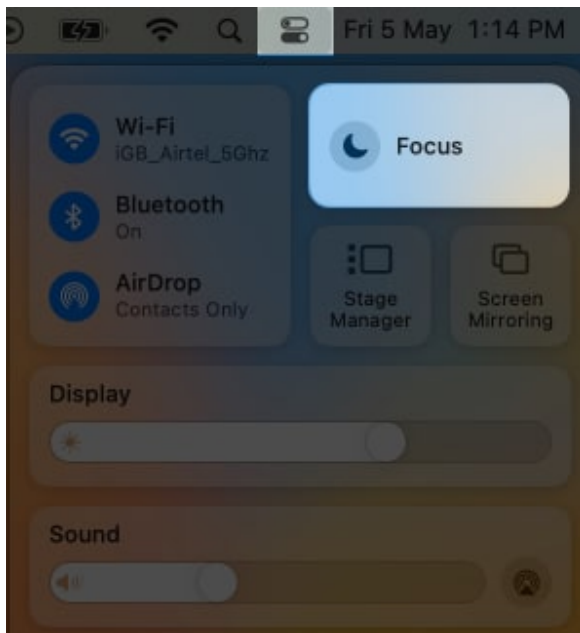

If you're somewhat like me, you're in luck because, in this article, I'm about to tell you how to turn off phone calls on Mac, both temporarily and permanently.

- [How to temporarily turn off phone calls on Mac](#)
- [How to permanently turn off phone calls on Mac](#)

How to temporarily turn off phone calls on Mac

1. Click the **Control Center** icon in the Mac menu bar → Select **Focus** from the list.

2. Choose **Do Not Disturb**.

Furthermore, you also have the option to choose between using focus mode for 1 hour or silencing the call until evening. If I want to learn more about the same, you can check out our complete guide on [how to use Control Center on Mac](#).
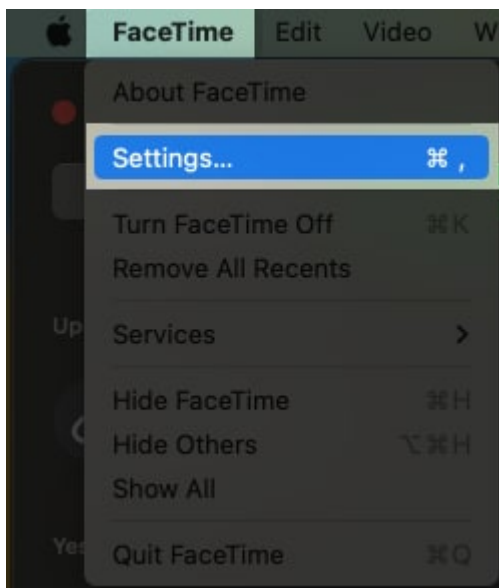

Using Siri

1. Invoke **Siri** from the Launchpad. You can also say **"Hey Siri"** if you've set it up.
2. Once Siri is listening, give the command, **"Turn on Do Not Disturb until this evening on my Mac."**
3. Now, **Siri** will confirm that the feature has been turned on.

Congratulations on successfully turning off phone calls on Mac, but keep in mind that this is only a temporary solution. To find a more permanent fix, please scroll down below.
