- [How to disable Remix Reels option on Instagram?](#)

Note: Ensure that you've updated and are using the latest Instagram app on your iPhone.

How to Remix Reels on Instagram from iPhone

1. Go to **Instagram** and open your previously published reel or any other reel you wish to remix.
2. Tap the **three-dot menu** and select **Remix this Reel**.

3. The following screen will split into two.
4. Hit the **Record button** at the bottom. The app will start recording your reel alongside the original one.

5. After recording, you get multiple editing options, which include:

- Changing/removing the audio or adding a voiceover
- Changing the speed
- Effects

- Touch up
- Timer
- Alignment
- Stickers
- Adding text or doodles

6. Once edited, add the caption and tap **Share**.

Note: The Facebook integration for remix reels is missing at this time.

How to disable Remix Reels option on Instagram?

As a creator, there are two ways to disable reels remixing on your iPhone. You can either turn off the option for an **individual reel** or **entirely disable it** from the Instagram Settings menu.

1. **Create** a Reel using standard tools and stickers and publish it.
2. Open the uploaded reel and tap the **three-dot menu** at the bottom.
3. Select **Disable remixing** from the following menu.

Using the trick above, you can only disable remixing for a single reel. If you want to block remixing option completely, follow the below steps.

1. Open **Instagram** and tap the **profile menu** at the bottom.

2. Select the **three-dot menu** at the top and tap **Settings** from the following pop-up menu.
3. Tap **Privacy**.

4. Navigate to **Reels** and Turn off **Enable remixing** from the following menu.

FAQs related to Instagram Remix

Q. Why can't I remix every reel?

There are multiple reasons. First, the creator might have disabled the remixing option from reels or settings. Also, the feature is only available for the newly uploaded Reels. To enable the remix reels option for your older reels, you must either upload them again or enable the remix feature for that specific Reels.

Q. Will I get notified when someone remixes my reel?

Yes, Instagram will send a notification when a public account remixes your reels.

Q. What If I set my account to private?

Remixes will be deleted if you set your account to private for longer than 24 hours.

Q. Can I download remixes of my reels?

No, you can't download remixes of your reels. Only remix creators can save your reel as part of their remix.

Q. What happens when I turn off remixing?

If you turn off remixing, remixes of your reels created before you changed your setting will stay on Instagram unless you delete your reel.

What are you waiting for? Go ahead, use the Remix reels function and start making fun videos to grow your Instagram fame. Share your experience with Instagram remix reels in the comments below.
