Whether you're a student, a business professional, or someone who frequently delivers presentations, the Presenter Overlay on macOS Sonoma offers you a seamless way to captivate your audience and present your visual content with flair. In this guide, I'll show you how to effectively use the new Presenter Overlay feature on macOS Sonoma.

- What is Presenter Overlay?
- How to use Presenter Overlay in macOS 14 Sonoma
- Customizations available in Presenter Overlay
- What are the benefits of using Presenter Overlay?

What is Presenter Overlay?

Source Apple

Presenter Overlay is a cool new feature rolled out with macOS Sonoma that lets you be seen on video calls even when you're presenting your screen. It puts a small floating picture of you on the screen so that you can move around. Additionally, the Presenter Overlay feature works seamlessly with other third-party apps.

Before proceeding, you must ensure that you meet the requirements listed below.

- Your Mac must run macOS Sonoma or later.
- You need a video calling app that supports Presenter Overlay, such as FaceTime, Zoom, and so on.

How to use Presenter Overlay in macOS 14 Sonoma

As of writing this article, you can easily use Presenter Overlay on FaceTime and Zoom, and the steps for both are outlined below.

iGEEKSBL^QG

Use Presenter Overlay with FaceTime

- 1. Launch **Spotlight** (command + spacebar).
- 2. Type **FaceTime** in the search bar \rightarrow Open the **FaceTime app**.

Q	FaceTime
	FaceTime
0	FaceTime requirements on Mac — Find out what you need to make FaceTime calls on you

3. Start a **new FaceTime call** or **join an ongoing call**.

Create Link Upcoming FaceTime FaceTime Link	Create Link Upcoming Image: FaceTime FaceTime Link FaceTime Link		
Upcoming FaceTime FaceTime Link	Upcoming FaceTime FaceTime Link FaceTime Link FaceTime Link		
Upcoming FaceTime FaceTime	Upcoming		
FaceTime	FaceTime FaceTime FaceTime FaceTime FaceTime FaceTime FaceTime	Upcoming	
FaceTime Link	FaceTime Link	Ø ■ FaceTime	
	FaceTime FaceTime	FaceTime Link	
		FaceTime Link	

4. Click on the **Share Screen icon**.

- 5. Choose whether to share a specific **Window** or your entire **Screen**.
- 6. Decide whether you want the Presenter Overlay to be **Small** or **Large**. If the attendee is using an iPhone, they'll see a Join Screen Sharing pop-up and must tap **Open** to start viewing.

Well done! You have successfully shared your screen in FaceTime and started Presenter Overlay.

Using Zoom and other third-party apps

- 1. Launch the **Zoom app**.
- 2. Start a **new call** or join an ongoing call.
- 3. Share your Mac screen by selecting the **Screen Share icon**.
- 4. Locate the **Presenter Overlay** feature.
 - You can access it in Advance \rightarrow Slides as Virtual Background in the Zoom app.
- 5. Click Share.

Now, you can see your floating screen in the bottom right corner of the screen. Moreover, the steps are almost similar for every other video calling app as well.

Customizations available in Presenter Overlay

- Background: You can choose a background color or image for a presenter overlay.
- **Position:** Drag and drop your presenter overlay to where you want it to appear on the screen.
- Size and position: The overlay's size is adjustable and can be placed at any location on your screen with a simple drag and drop.
- Effects: Pick from a variety of effects and add them to the overlay's background.

What are the benefits of using Presenter Overlay?

With Presenter Overlay, you can captivate your audience and deliver a more effective presentation. Some of the advantages of using it are listed below.

- **Stay engaged with your audience:** This feature aids in maintaining audience engagement by keeping you present and involved in the conversation. This is particularly crucial when giving presentations because you need to be able to connect with your audience and respond to their questions.
- Make your presentations more engaging: Presenter Overlay makes your presentations more interesting as it enables you to move around freely and make gestures during your presentations. This can assist you in emphasizing important points and improving the visual appeal of your presentations.
- Improve collaboration: Collaboration can be enhanced by facilitating idea sharing

and discussion using Presenter Overlay. It can also assist you in staying on task and ensuring that everyone is in agreement when working on a project with others.

Upgrade your presentation game!

With the rollout of Presenter Overlay with macOS Sonoma, you can now seamlessly combine your content and delivery to elevate your presentations to the next level. The feature makes it simple to present your slides while keeping eye contact with your audience, which improves engagement and connection.
