We all have experienced <u>Avatars on Facebook</u>, Instagram, and Messenger for quite a long time. Now, WhatsApp has rolled out the same feature. So, you can create a WhatsApp Avatar on your iPhone by choosing various outfits, hairstyles, and facial features. Excited to learn how to use WhatsApp Avatars on iPhone? I have mentioned the detailed steps below.

What is WhatsApp Avatar?

Recently, WhatsApp introduced great features like a message-yourself tool, call links, polls, and <u>Communities</u>. And now you have a fresh, fun means of self-expression. WhatsApp allows you to create personalized digital avatars and make your WhatsApp Avatar a profile photo.

Besides, after creating, you may share them with others. It offers 36 personalized stickers based on facial expressions and behaviors. WhatsApp added additional styling features to improve the user experience, including lighting, hairdo textures, shading, and countless other customization choices.

Note: Update your WhatsApp from App Store to access the feature.

How to create WhatsApp Avatar on iPhone

- 1. Launch **WhatsApp** \rightarrow go to **Settings**.
- 2. Tap Avatar and then select Create Your Avatar.

- 3. You will be redirected to a new page and prompted to build an Avatar for WhatsApp. Tap **Get Started**.
- 4. Then, you'll see the option to **Take photo** or **Create manually**. I've selected Create manually.
- 5. Now you need to **choose a skin tone** that will result in a preview of your Avatar. Then customize it using styling options like body, face shape, nose, lips, hairstyle, hair color, eye shape and color, eye makeup, outfit, etc. Use the front camera option (a mirror icon) to make your Avatar more lifelike. Also, when you do any changes, you can see how it looks from the preview above.
- 6. When you are done, tap **Done** from the upper right corner.
