## Netflix Tips and Tricks for iPhone, iPad, and Mac

### #1. Like and Dislike feature

Netflix changed their rating system in 2017, and maybe it was a good move. Users can now rate content with Thumbs Up/Down. Make sure you give your thumb up or down if you like or dislike any show or movie.

This will enable Netflix algorithm to sort your feed accordingly. Whether you believe it or not, these thumbs up and down does matter to you. After giving specific numbers of feedbacks, Netflix algorithms start their work and show you shows and movies relevant to the content you have liked.

It's a general behavior to quit the app once we have completed watching, but next time make sure you do give your thumb to the content you watched.

## #2. Profiling

Only a few lucky souls on the earth are privileged enough to have a personal Netflix account. While most of us have to share with family, the problem is that maybe your kids and wife like different content, while you may be interested in something else. This leads to a completely messed up recommendations on your feed.

A simple solution to this problem is to create a different profile for different people. Doing so will sort recommendations to respective profile. Combine profiling with thumbs up/down, and you'll see perfect recommendations suiting your preferences.

**To create a profile:** Open Netflix → Click on Drop-down button from the far right → Click on **Manage Profiles**.

Click on **Add profile**.

### **#3. Manually making the list**

No one understands you better than yourself, not even Netflix's algorithms. Keeping that thought in mind, Netflix has an option where you can make your list, and it will show you just that. Also, any changes you make in the list will sync across all devices, meaning you won't need to do the hard work again.

To add any movie/TV show to "My List," Find the movie and click on My List.

To manage your list, click on **My List** from the top navigation → **Hover-over** your mouse pointer/trackpad → you can **rearrange the order** or **delete the content** from My List.

## #4. Delete viewing history

As mentioned above, most of us share our Netflix with family and friends and the viewing

history is visible to everyone. If you care about your privacy, you may be looking for a way to remove this history so other won't find out what you are watching.

To do so, click on **Drop-down arrow** → Click on **Account**.

Click on **Viewing activity** under **My Profile**.

Click on **Hide icon**.

## #5. Request Movie or TV Show on Netflix

Just in case if you fail to find what exactly you are looking for, it is the time to invoke the lord, the Netflix itself.

Click on the **Drop-down button** then click on **Help Center**.

Under **Quick Links**, Click on **Request TV shows or movies**.

## #6. Play the Spin Game

It happens with all of us that we waste time finding the show and then realize that it's time sleep and you didn't watch anything. There's a free Spinning game available at [reelgood.com](https://reelgood.com), where you can select the genre, IMDB rating, etc. and click the spin button.

It will randomly select a show/movie to help you decide what to watch and save your time searching. It's a third-party free service, which also allows you to select shows from Prime, Hulu, Netflix, HBO, etc.

## #7. Netflix Keyboard Shortcuts for Mac

If Mac is your primary device for watching shows and movies, mastering the keyboard shortcuts is a must. Below are some handy ones for your help:

- Press "F" to quickly have a full-screen mode and to exit press "Esc."
- Use "Spacebar" to Play/Pause easily

- To fast forward movie or show, press “Shift + Right Arrow” and “Shift + Left Arrow” to rewind
- You can use “M” key to mute or unmute quickly
- To increase or decrease the volume, press Shift + Up arrow or Shift + Down arrow respectively

## #8. Shortcuts for iPhone and iPad

There aren't many shortcuts for iPhone or iPad, but one of the handiest one is fast forward and rewinding using the screen taps.

Just double tap on the right side of the screen while watching on Netflix to fast-forward and double tapping on the left will rewind.

## #9. Subtitle Customization

Watching shows or movies in a language that isn't your primary language is a real tough job. There are subtitles available, but at times they get mixed up with the background color of the movie or show you are watching and maybe you miss the most important line.

There's an option to customize the way subtitles appear. You need to log in your Netflix account from any browser, head over to Accounts, and then click on “Subtitle appearance.” In this screen, you can customize fonts, font size, background color, and much more.

## #10. Turn off autoplay

If you don't want Netflix to autoplay next episode at the end of a current episode, you can do so from the browser. Just log in to your account from a web browser, under Accounts, click on "Playback Settings."

You can **check/uncheck** autoplay option to turn it on/off.

Besides, you can also customize the default quality on this page. If you are viewing Netflix on data, switching to medium or low quality is recommended.

## #11. Chrome Extensions for Netflix

### FindFlix Extension

This extension for Chrome brings the huge library of Netflix at your fingertips. No matter what you are browsing, just click the extension icon on Chrome and you are presented with a search box. The intelligent search engine finds the show or movie almost instantly. It's a great tool, and above all, it's completely free.

### Netflix Party Extension

Let love be in the air, especially if you are in a long distance relationship. With the Netflix

Party extension you can sync video playback with friends or that special one; also it adds a group chat option to shares your heart out while watching. It's free and light on the browser and perfectly does the job for what it is made for.

To view downloaded movies or TV shows, tap on **“Downloads.”**

There are certain limitations when downloading. First is the limit of the number of devices you can download content, depending on the plan you have. Another thing is the expiry date of the downloads. Also, there's a condition to finish viewing once you have started. So it's not that fancy as it sounds.

## #13. Delete Downloads

Just because you have the freedom to download doesn't mean there won't be any consequences. Depending on the quality, these downloads eat up a lot of space of your iPhone and iPad. However, there's a way to control it.

Make sure you download videos in SD quality rather than HD, to save some space. In order to delete all videos, tap on **More** → **App Settings** → **Delete All Downloads**.

If you want to delete particular movie/show; Tap on **Downloads** tab → Tap on **Movie/Show** → Tap on **Edit** → Tap on **Delete button**.

Alternately, you can **swipe right to left** and tap on **Delete button**.

## #14. Create your Flixtape

By visiting [flixtape.netflix.com](https://flixtape.netflix.com), you can create your own Flixtape. Flixtape is customized playlist made from a theme, or feeling, or mood. Also, you can also share it with your friends and family. To add a little spice, you can even customize the cover of your Flixtape. It's free

and worth a try.

## #15. Become Netflix Beta Tester

If you are madly in love with Netflix and would like to have your hands on the new features before anyone else, you may consider getting yourself enrolled as a Test Participant.

To do so, just head over to **Accounts** → **Test Participation** and turn ON the switch.

That's all folks!
